

## **Cast Stone Cleaning Instructions**

Simple soap and water solution can be used with a non-abrasive cloth. We recommend you mix 1 gallon of water with a cup of bleach and add about a teaspoon of dish washing soap. Windex can also be used. Cleaners containing acids should never be used and will harm the surface of your table as well as void the manufacturer warranty.

### **DO NOT USE:**

- Acidic Cleaners
- Abrasive Cleaners
- Solvent Cleaners

### **USE:**

- Soap + Water
- Clorox (very diluted) + Water
- Windex
